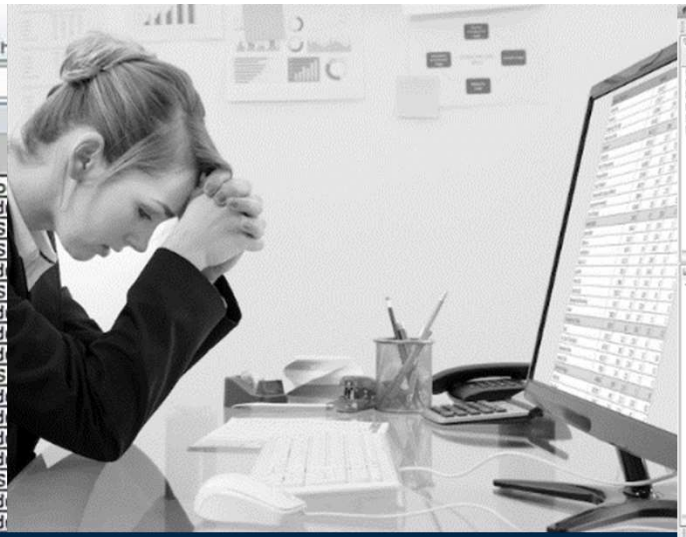
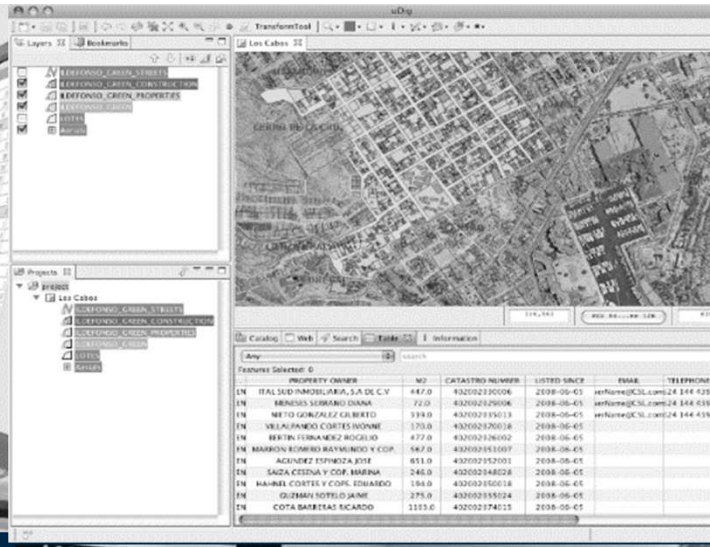
Managing Environmental Projects on a Live Map

There is no easy way to keep track of environmental activities, costs and maps across multiple locations

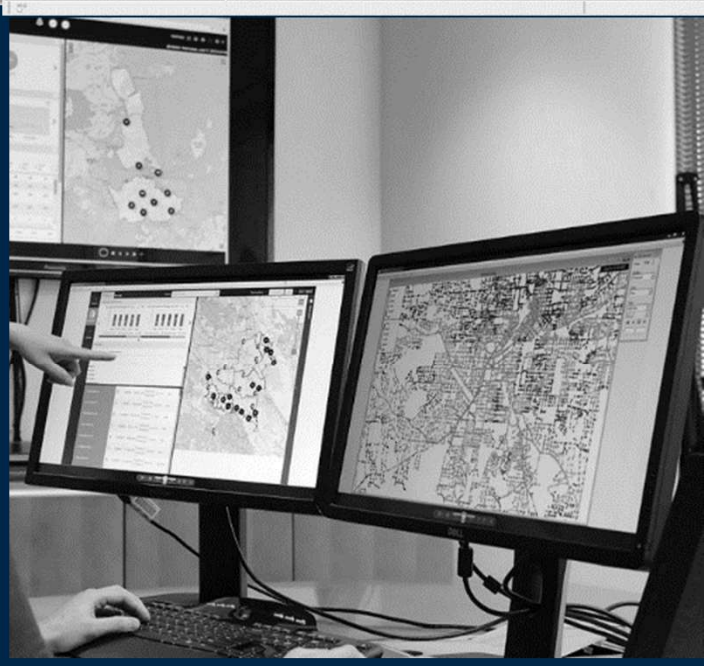




Spreadsheets, complicated mapping software and even pen-and-paper are still being used.

Information are often kept in silos and are difficult to share.

Billions of $ are lost due to inefficiency and regulatory non-compliance



Did you know?

Cost of spreadsheets

88% of all spreadsheets contains **at least 1 error**

Erroneous programming

A case of hefty mistake :

omission of a minus sign costs British Gov't ***over $75M***

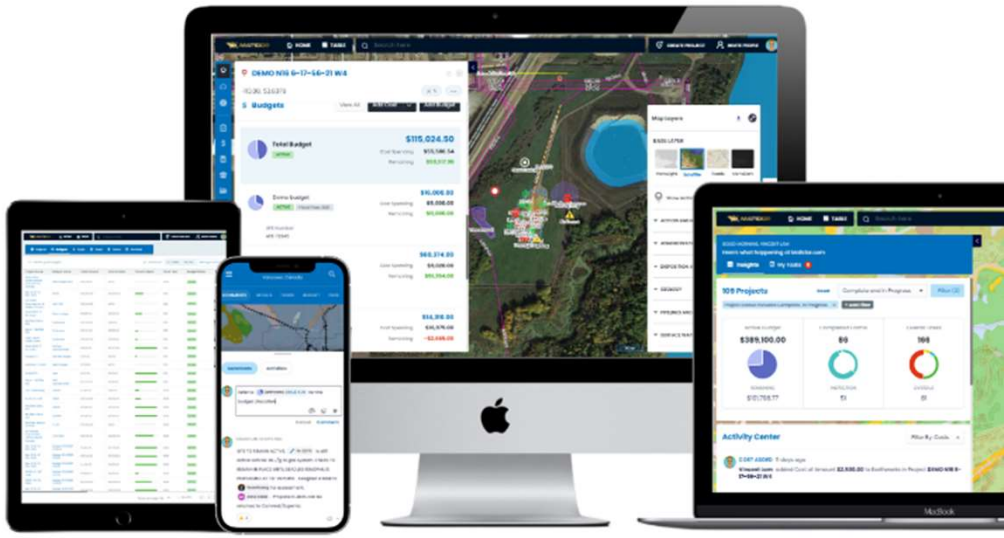
Cost of data silos

54% of organizations have as many as **200 applications on their private network**

Employees waste **30 mins to 2 hours every day** looking for information

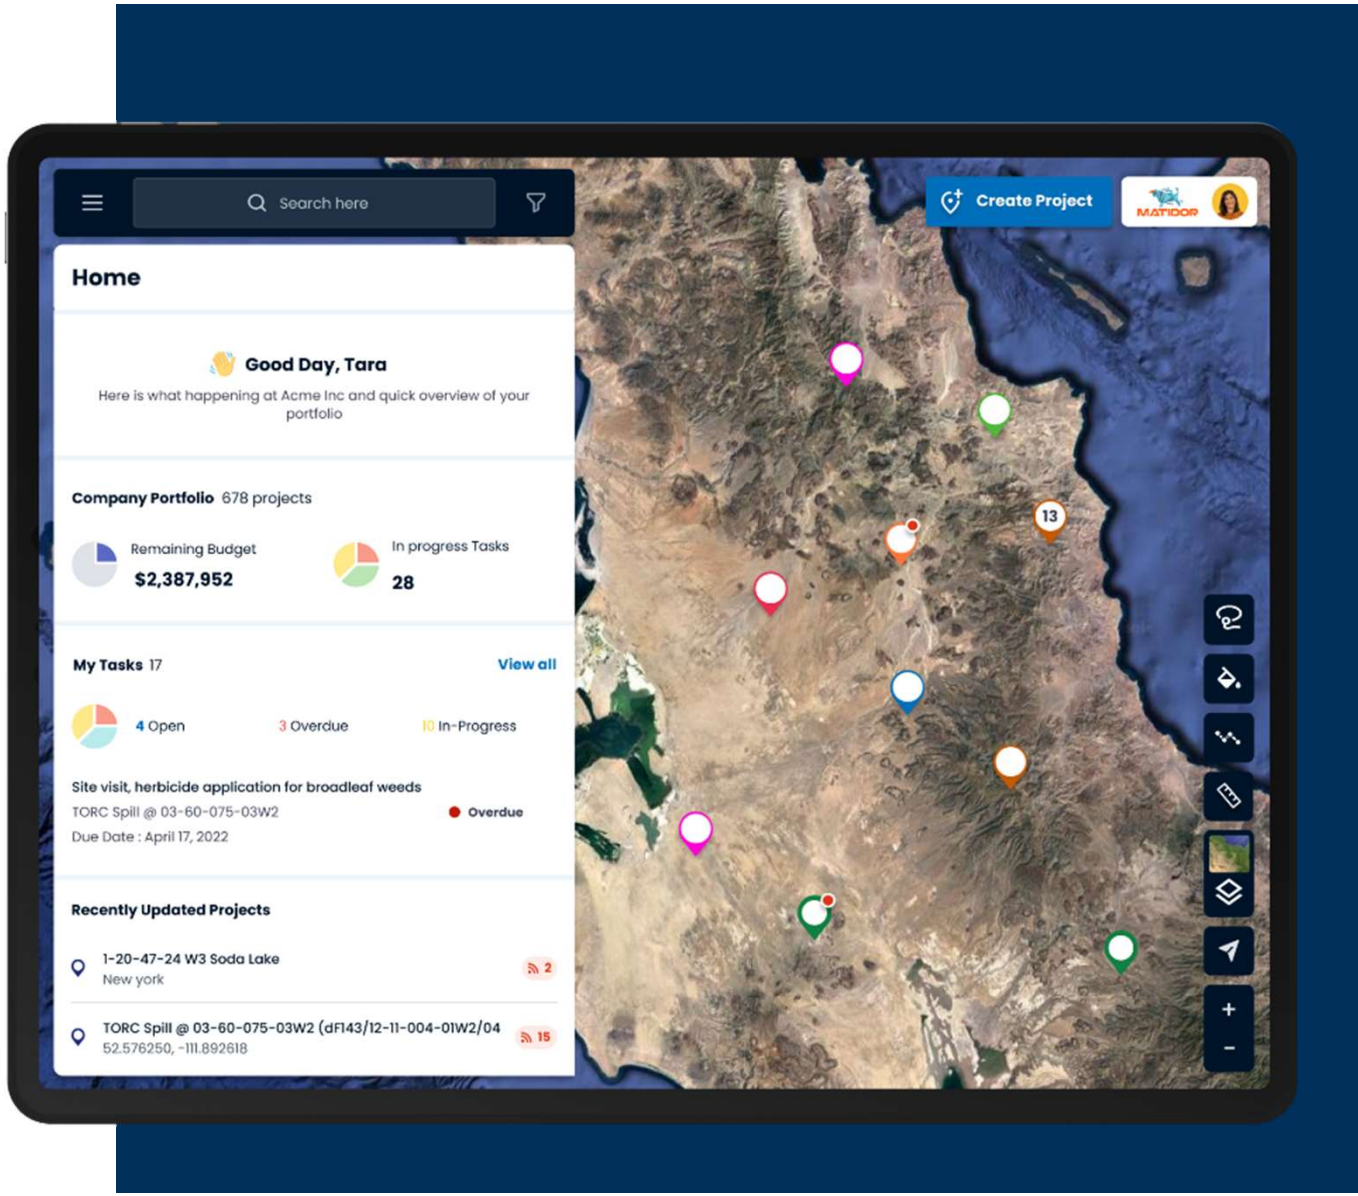
Project management on a live map

1. Intuitive
2. Geospatial
3. Collaborative



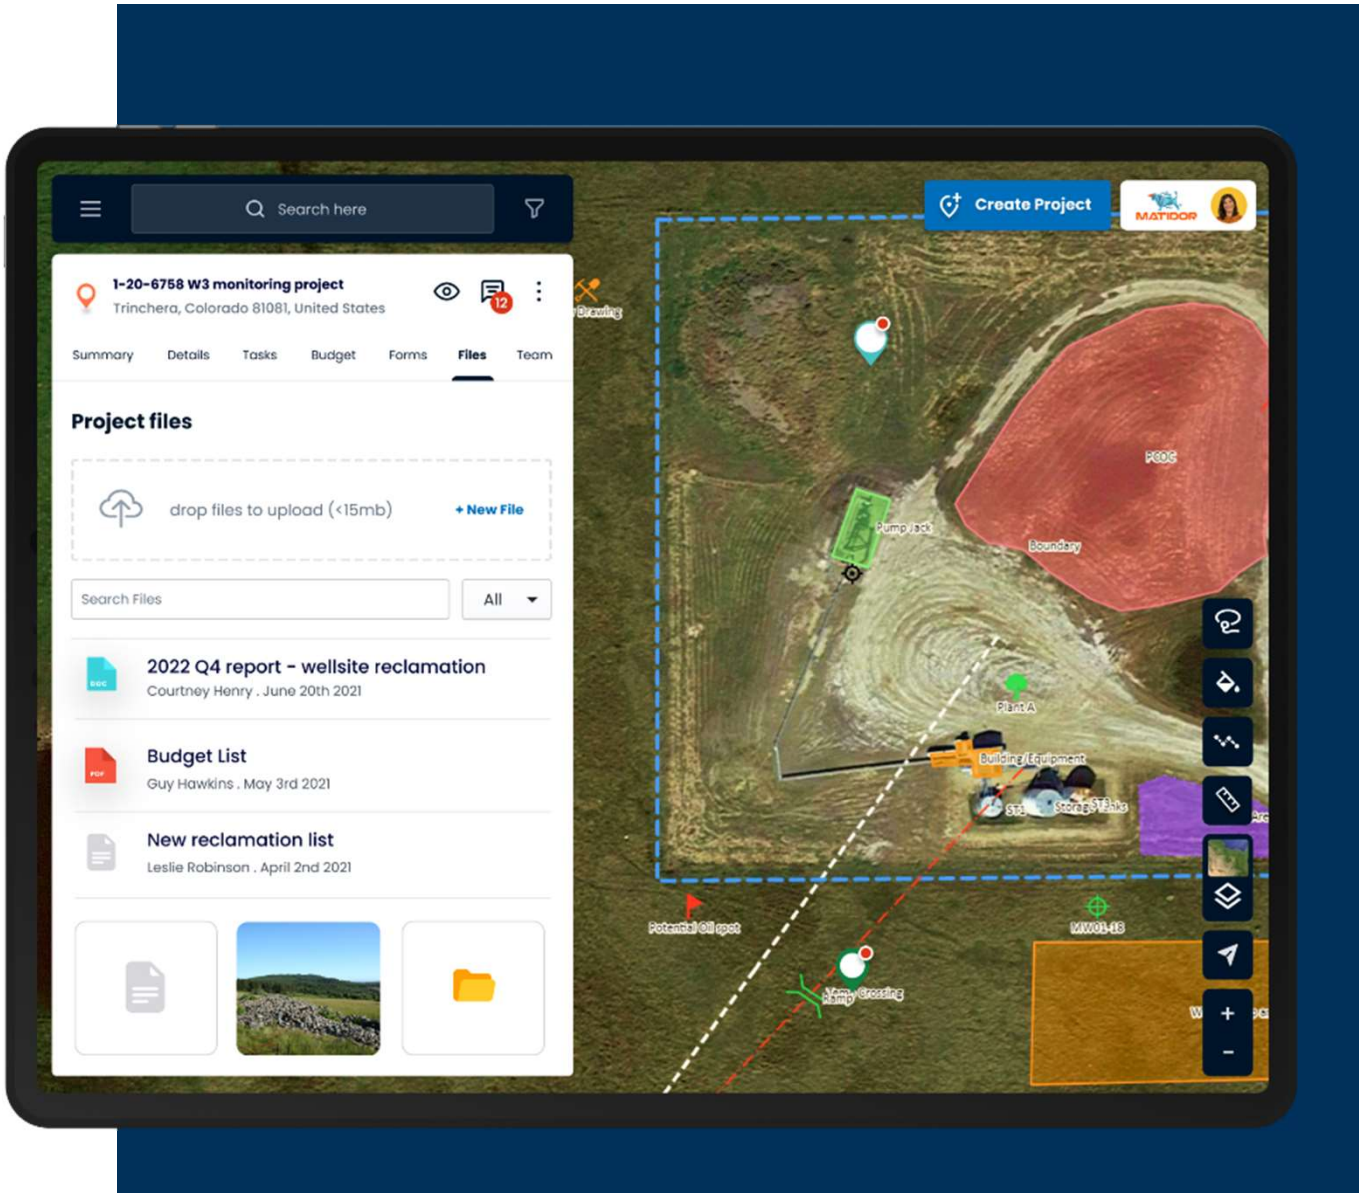
Visualize Clearly

See your site programs clearly on a map in real-time



Manage With Ease

Access key site project information with powerful GIS integration



Share and collaborate

Invite anyone to join and work together securely
